Table of Contents

Chapters

1. Introduction 1–1
1.1 Overview 1–1
1.2 Project Proponent 1–1
1.2.1 Total E&P PNG Limited 1–3
1.2.2 Project Partners 1–3
1.3 Project Overview 1–4
1.3.1 Development Outline 1–4
1.3.2 Producing the Gas and Condensate 1–4
1.3.3 Transporting the Gas and Condensate 1–6
1.3.4 Infrastructure 1–6
1.3.5 Logistics 1–6
1.3.6 Current Project Status and Development Timeline 1–6
1.4 Project History and Viability 1–7
1.4.1 History of the Resource 1–7
1.4.2 Scale of the Resource 1–9
1.4.3 Objectives and Purpose of Development 1–9
1.4.4 Consistency with the State of PNG Development Policy and Strategies 1–9
1.4.5 Impacts and Benefits of the Project 1–13
1.5 This Document 1–14
1.5.1 Statutory Context 1–14
1.5.2 EIS Process Timeline 1–14
1.5.3 EIS Objectives 1–14
1.5.4 EIS Structure 1–14
1.5.5 Guide to the Document 1–15
1.5.6 Public Review and Submissions 1–17
1.6 References 1–17
2. Regulatory Framework, Policies, Standards and Guidelines 2–1
2.1 Introduction 2–1
2.2 Legislation Governing Project Approval 2–1
2.2.1 Environment Act 2000 2–1
2.2.2 Oil and Gas Act 1998 2–4
2.3 Other PNG Legislation and Guidelines 2–6

2.4 International Conventions, Standards and Guidelines 2–10
2.4.1 International Conventions 2–10
2.4.2 Equator Principles and IFC Performance Standards 2–14
2.4.3 Other Guidelines 2–16
2.5 TEP PNG Standards and Specifications 2–16
2.6 References 2–17
3. Impact Assessment Process and Method 3–1
3.1 ESIA Process Overview 3–1
3.1.1 Screening 3–3
3.1.2 Scoping and Defining the Study Area 3–3
3.1.3 Characterizing the Baseline 3–5
3.1.4 Impact Assessment Methods 3–7
3.1.5 Reporting of the Assessment 3–11
3.2 Project Evolution and Adaptive Management 3–11
3.3 References 3–12
4. Project Description 4–1
4.1 Introduction 4–1
4.2 Gasfield and the Resources 4–2
4.2.1 Geology and Reservoirs 4–2
4.2.2 Gas 4–2
4.2.3 Condensate 4–5
4.2.4 Produced Water 4–5
4.2.5 Production Profiles 4–5
4.3 Wells and Wellpads 4–5
4.3.1 Number, Location and Footprint 4–5
4.3.2 Wellpads and Gathering Systems 4–7
4.4 Flowlines and Trunklines 4–7
4.4.1 Characteristics of the Flowlines and Trunklines 4–7
4.4.2 Routing of the Flowlines and Trunklines 4–9
4.5 Gas Processing Facilities 4–9
4.5.1 Generalities 4–9
4.5.2 Proposed Site 4–9
4.5.3 General Description of the CPF 4–10
4.6 Transporting the Gas 4–12

4.6.1 Export Pipelines 4–12
4.6.2 Onshore Pipelines 4–12
4.6.3 Offshore Pipelines 4–15
4.7 Personnel and Accommodation 4–15
4.7.1 Worker Requirements 4–15
4.7.2 Accommodation Facilities 4–17
4.8 Infrastructure 4–17
4.8.1 Facilities at Port Moresby 4–17
4.8.2 Herd Base 4–17
4.8.3 Roads 4–20
4.8.4 Quarries 4–20
4.8.5 Waste Management 4–23
4.8.6 Logistics Base 4–25
4.8.7 Existing Purari Airstrip and Extension 4–25
4.9 Logistics and Transport 4–27
4.9.1 Material, Equipment, Fuel and Chemical Volumes to be Transported 4–27
4.9.2 Transport Methods and Routes 4–30
4.9.3 Safety and Security 4–37
4.10 Construction 4–40
4.10.1 Timing 4–40
4.10.2 Common Early Works Activities 4–41
4.10.3 Drilling 4–47
4.10.4 Constructing the Central Processing Facility and Associated Infrastructure 4–51
4.10.5 Constructing the Onshore Pipelines 4–52
4.10.6 Constructing the Offshore Pipelines 4–66
4.11 Operations 4–72
4.11.1 Operating and Maintaining the Processing Facilities 4–72
4.11.2 Operating and Maintaining the Wells and Gathering Systems 4–81
4.11.3 Operating the Pipelines 4–81
4.11.4 Operating and Maintaining the Camps 4–83
4.11.5 Cleaner Production and Energy Balance 4–83
4.12 Decommissioning 4–84
4.12.1 Decommissioning the Wellpads and CPF 4–84
4.12.2 Decommissioning the Pipelines 4–85

4.12.3 Decommissioning the Infrastructure 4–85
4.13 Project Summary 4–86
4.13.1 Project Activities 4–86
4.13.2 Disturbance Footprint 4–87
4.13.3 Embedded Design Controls 4–99
4.14 References 4–98
5. Project Options and Analysis 5–1
5.1 Introduction 5–1
5.1.1 Options Analysis Approach 5–1
5.1.2 Alternatives Considered 5–2
5.1.3 Consideration of Alternatives During the FEED Phase 5–3
5.2 Commercialization and Export Options 5–4
5.2.1 Gas Commercialization 5–4
5.2.2 Condensate Export 5–5
5.2.3 Gas and Condensate Export Optimization 5–5
5.3 Location and Layout Alternatives 5–7
5.3.1 Central Processing Facility 5–7
5.3.2 Wellpads and Gathering Station 5–9
5.3.3 Logistics Facilities 5–9
5.4 Routing Alternatives 5–10
5.4.1 The Gathering Network 5–10
5.4.2 Onshore Export Pipelines 5–14
5.4.3 Offshore Export Pipelines 5–16
5.5 Process and Technology Alternatives 5–18
5.5.1 Acid Gas Management 5–18
5.5.2 Produced Water Management 5–20
5.6 Construction Alternatives 5–21
5.6.1 Quarries 5–21
5.6.2 River Crossings and Shore Crossings 5–22
5.7 Transportation and Logistics Options 5–24
5.7.1 Air Transport 5–24
5.7.2 Water Transport 5–26
5.8 No-Project Option 5–26

6. Stakeholder Engagement 6–1
6.1 Introduction 6–1
6.2 Objectives, Principles and Engagement Methods 6–1
6.2.1 Objectives 6–1
6.2.2 Principles 6–2
6.2.3 Stakeholder Identification and Mapping 6–3
6.2.4 Information Disclosure and Data Management 6–8
6.3 EIS Engagement Program 6–12
6.3.1 Background 6–12
6.3.2 Scoping and Environmental Inception Report Disclosure 6–13
6.3.3 Baseline Studies 6–13
6.3.4 Environmental Impact Statement Disclosure 6–23
6.4 Engagement Outcomes 6–23
6.4.1 Issues Raised by Stakeholders 6–23
6.4.2 Community Support for the Project 6–30
6.5 Continuing Engagement Activities 6–30
6.5.1 Update of the Stakeholder Engagement Plan 6–30
6.5.2 Planned Activities 6–30
6.5.3 Achieving Free, Prior and Informed Consent 6–31
6.5.4 Monitoring and Reporting 6–32
6.6 References 6–32
7. Existing Environment – Terrestrial 7–1
7.1 General Setting 7–1
7.2 Geology, Terrain and Soils 7–2
7.2.1 Regional Context 7–2
7.2.2 Study Overview 7–5
7.2.3 Geology Baseline Characterization 7–5
7.2.4 Geomorphology and Terrain Baseline Characterization 7–8
7.2.5 Soils Baseline Characterization 7–11
7.3 Hydrology and Meteorology 7–14
7.3.1 Regional Context 7–14
7.3.2 Baseline Characterization 7–15
7.4 Surface Water and Sediment Quality 7–26
7.4.1 Study Overview 7–26

7.4.2 Surface Water Baseline Characterization 7–28
7.4.3 Sediment Quality Baseline Characterization 7–35
7.5 Groundwater 7–38
7.5.1 Regional Context 7–38
7.5.2 Study Overview 7–39
7.5.3 Groundwater Conceptualization 7–41
7.5.4 Groundwater Quality Baseline Characterization 7–42
7.6 Freshwater and Estuarine Biodiversity 7–45
7.6.1 Regional Context 7–45
7.6.2 Aquatic Habitats Baseline Characterization 7–45
7.6.3 Aquatic Fauna Baseline Characterization 7–52
7.6.4 Sensitive Species, Ecosystems and Habitat Features 7–56
7.6.5 Introduced and Invasive Species 7–60
7.6.6 Metals and Polycyclic Aromatic Hydrocarbons in Aquatic Fauna 7–60
7.7 Terrestrial Biodiversity 7–61
7.7.1 Study Overview 7–61
7.7.2 Study Area 7–62
7.7.3 Ecological Zones 7–65
7.7.4 Regional and Biogeographic Setting 7–65
7.7.5 Vegetation 7–70
7.7.6 Flora and Fauna 7–86
7.7.7 Protected Areas, Priority Ecosystems and Focal Sites 7–105
7.7.8 Baseline Sensitivity 7–114
7.8 Vegetation Regeneration 7–118
7.8.1 Study Overview 7–118
7.8.2 Tropical Forest Rehabilitation 7–119
7.8.3 Regeneration Response to Disturbance Across Different Surfaces 7–122
7.8.4 Rehabilitation of Vegetation Types and Landforms 7–124
7.9 References 7–128
8. Existing Environment – Marine 8–1
8.1 General Setting 8–1
8.2 Seabed and Coastal Geomorphology 8–3
8.2.1 Regional Context 8–3
8.2.2 Baseline Characterization 8–3

8.3 Physical Oceanography 8–11
8.3.1 Regional Context 8–11
8.3.2 Baseline Characterization 8–12
8.4 Marine Water and Sediment Quality 8–19
8.4.1 Regional Context 8–19
8.4.2 Marine Water Quality Baseline Characterization 8–21
8.4.3 Marine Sediment Baseline Characterization 8–33
8.4.4 Summary of Water and Sediment Quality 8–37
8.5 Marine Biodiversity 8–37
8.5.1 Regional Context 8–37
8.5.2 Marine Habitat Baseline Characterization 8–37
8.5.3 Marine Fauna Baseline Characterization 8–47
8.5.4 Sensitive Species, Ecosystems and Habitat Features 8–60
8.5.5 Introduced and Invasive Species 8–62
8.6 Marine Fisheries and Resources 8–64
8.6.1 Regional Context 8–64
8.6.2 Marine Fisheries and Resource Baseline Characterization 8–64
8.7 Underwater Noise 8–74
8.7.1 Regional Context 8–75
8.7.2 Baseline Characterization 8–75
8.8 References 8–79
9. Existing Environment – Social, Economic and Cultural 9–1
9.1 Study Overview 9–1
9.2 General Setting 9–3
9.2.1 Communities and Language Groups 9–3
9.2.2 Historical Context 9–6
9.2.3 Land Ownership 9–8
9.3 Governance 9–9
9.3.1 Traditional Leadership 9–9
9.3.2 Religious Leadership 9–9
9.3.3 Government Administration 9–10
9.3.4 External Support 9–11
9.4 Economy and Employment 9–11
9.4.1 Large-scale Industry 9–11

9.4.2 Small-scale Industry 9–12
9.4.3 Employment 9–13
9.5 Community Demographics 9–14
9.5.1 Population and Household Characteristics 9–14
9.5.2 Religion 9–18
9.5.3 Migration 9–18
9.5.4 Housing and Community Infrastructure 9–19
9.5.5 Household Wealth 9–23
9.6 Education 9–27
9.6.1 Access to Education 9–27
9.6.2 Education Levels and Literacy 9–31
9.7 Community Health and Safety 9–31
9.7.1 Access to Healthcare 9–31
9.7.2 Food Security and Nutrition 9–32
9.7.3 Maternal and Child Health 9–35
9.7.4 Communicable Respiratory Diseases 9–35
9.7.5 Vector-borne Diseases 9–38
9.7.6 Sexually Transmitted Infections 9–38
9.7.7 Accidents and Injuries 9–39
9.7.8 Alcohol and Drug Dependency 9–39
9.7.9 Domestic Violence 9–40
9.7.10 Community Safety 9–40
9.8 Livelihoods and Natural Resource Use 9–41
9.8.1 Ecological Zones 9–41
9.8.2 Land and Natural Resource Setting 9–41
9.8.3 Land Tenure 9–43
9.8.4 Agriculture 9–43
9.8.5 Fishing 9–49
9.8.6 Hunting and Collecting 9–50
9.8.7 Subsistence Labor 9–53
9.9 Community Security (Law and Order) 9–55
9.9.1 Law and Order System and Resolution 9–55
9.9.2 Law and Order in the PAOI 9–56
9.9.3 Sense of Security 9–56

9.9.4 Tensions 9–58
9.10 Community Transport and Access 9–58
9.10.1 River and Sea Travel 9–58
9.10.2 Roads, Walking Tracks and Airstrips 9–59
9.10.3 Access to Markets 9–60
9.11 Cultural Heritage and Archaeology 9–60
9.11.1 Tangible Cultural Heritage Sites and Materials 9–60
9.11.2 Intangible Cultural Heritage Values 9–66
9.12 Ethnic Groups 9–68
9.13 Gender 9–70
9.14 Pre-existing Vulnerability 9–72
9.14.1 Approach to Identifying Vulnerability in the PAOI 9–73
9.14.2 Preliminary Vulnerability Criteria 9–74
9.14.3 Pre-existing Vulnerability 9–74
9.15 References 9–80
10. Existing Environment - Amenity 10–1
10.1 General Setting 10–1
10.2 Air Quality 10–2
10.2.1 Study Overview 10–2
10.2.2 Factors Affecting Air Quality 10–5
10.2.3 Air Quality Baseline Characterization 10–5
10.3 Noise 10–11
10.3.1 Study Overview 10–11
10.3.2 Factors Affecting Noise 10–12
10.3.3 Noise Baseline Characterization 10–14
10.4 Landscape and Visual Amenity 10–15
10.4.1 Study Overview 10–15
10.4.2 National and Regional Setting 10–15
10.4.3 Landscape Character Description 10–15
10.5 Commercial Marine and River Transport 10–25
10.5.1 Study Overview 10–25
10.5.2 International and Coastal Shipping 10–26
10.5.3 Commercial Fishing 10–28
10.5.4 Commercial River Traffic 10–28

10.6 Waste Characterization 10–29
10.6.1 Study Overview 10–29
10.6.2 Waste Classifications 10–30
10.6.3 Waste Management Facilities – Receiving Environment 10–30
10.7 References 10–33
11. Impacts: Terrestrial 11–1
11.1 Landforms and Soils 11–1
11.1.1 Context 11–1
11.1.2 Discipline-specific Impact Assessment Method 11–3
11.1.3 Identification of Potential Impacts 11–5
11.1.4 Proposed Mitigation and Management Measures 11–10
11.1.5 Residual Impact Assessment 11–11
11.1.6 Summary of Assessment of Residual Impact Significance 11–16
11.2 Groundwater 11–20
11.2.1 Context 11–20
11.2.2 Discipline-specific Impact Assessment Method 11–22
11.2.3 Identification of Potential Impacts 11–23
11.2.4 Proposed Mitigation and Management Measures 11–27
11.2.5 Residual Impact Assessment 11–27
11.2.6 Summary of Residual Impacts to Groundwater 11–31
11.3 Hydrology, Fluvial Geomorphology and Sediment Processes 11–34
11.3.1 Context 11–34
11.3.2 Discipline-specific Impact Assessment Method 11–35
11.3.3 Identification of Potential Impacts 11–39
11.3.4 Proposed Mitigation and Management Measures 11–53
11.3.5 Residual Impact Assessment 11–57
11.3.6 Summary of Residual Impacts to Hydrology, Fluvial Geomorphology and Sediment Processes 11–62
11.4 Surface Water Quality 11–65
11.4.1 Context 11–65
11.4.2 Discipline-specific Impact Assessment Method 11–65
11.4.3 Identification of Potential Impacts 11–67
11.4.4 Proposed Mitigation and Management Measures 11–71
11.4.5 Residual Impact Assessment 11–71
11.4.6 Summary of Residual Impacts to Surface Water Quality 11–74

11.5 Freshwater and Estuarine Biodiversity 11–76
11.5.1 Context 11–76
11.5.2 Discipline-specific Impact Assessment Method 11–76
11.5.3 Identification of Potential Impacts 11–79
11.5.4 Proposed Mitigation and Management Measures 11–95
11.5.5 Residual Impact Assessment 11–95
11.5.6 Summary of Residual Impacts to Freshwater and Estuarine Biodiversity 11–106
11.6 Terrestrial Biodiversity 11–112
11.6.1 Context 11–112
11.6.2 Discipline-specific Impact Assessment Method 11–113
11.6.3 Identification of Potential Impacts 11–119
11.6.4 Proposed Mitigation and Management Measures 11–136
11.6.5 Residual Impact Assessment 11–147
11.6.6 Summary of Residual Impacts to Terrestrial Biodiversity 11–157
11.7 References 11–173
12. Impacts: Marine 12–1
12.1 Marine Physical and Sediment Processes 12–1
12.1.1 Context 12–1
12.1.2 Discipline-specific Impact Assessment Method 12–1
12.1.3 Identification of Potential Impacts 12–6
12.1.4 Proposed Mitigation and Management Measures 12–7
12.1.5 Residual Impact Assessment 12–7
12.1.6 Summary of Residual Impacts to Marine Physical and Sediment Processes 12–16
12.2 Marine Water Quality 12–20
12.2.1 Context 12–20
12.2.2 Discipline-specific Impact Assessment Method 12–20
12.2.3 Identification of Potential Impacts 12–20
12.2.4 Proposed Mitigation and Management Measures 12–23
12.2.5 Residual Impact Assessment 12–23
12.2.6 Summary of Residual Impacts to Marine Water Quality 12–25
12.3 Marine Biodiversity 12–26
12.3.1 Context 12–26
12.3.2 Discipline-specific Impact Assessment Method 12–27
12.3.3 Identification of Potential Impacts 12–33

12.3.4 Proposed Mitigation and Management Measures 12–41
12.3.5 Residual Impact Assessment 12–43
12.3.6 Summary of Residual Impacts to Marine Biodiversity 12–51
12.4 Underwater Noise 12–55
12.4.1 Context 12–55
12.4.2 Discipline-specific Impact Assessment Method 12–55
12.4.3 Identification of Potential Impacts 12–61
12.4.4 Proposed Mitigation and Management Measures 12–64
12.4.5 Residual Impact Assessment 12–65
12.4.6 Summary of Residual Impacts for Underwater Noise 12–70
12.5 References 12–74
13. Impacts: Social 13–1
13.1 Introduction 13–1
13.1.1 PAOI Communities 13–1
13.1.2 PRL-15 13–1
13.1.3 Export Pipeline Route 13–3
13.1.4 River Transport Corridor 13–5
13.1.5 National Context 13–7
13.1.6 Project Social and Economic Development Context 13–7
13.1.7 In-migration 13–8
13.2 Social Impact Assessment Method 13–10
13.2.1 Identification of Potential Impacts 13–12
13.2.2 Assessment of Potential Impacts 13–12
13.3 Economic Displacement and Livelihoods 13–18
13.3.1 Context 13–18
13.3.2 Identification and Initial Assessment of Potential Impacts 13–19
13.3.3 Proposed Mitigation, Management and Optimization Measures 13–23
13.3.4 Residual Impact Assessment 13–25
13.3.5 Summary of Residual Economic Displacement and Livelihoods Impacts 13–26
13.4 Economic Development and Employment 13–28
13.4.1 Context 13–28
13.4.2 Identification and Initial Assessment of Potential Impacts 13–30
13.4.3 Proposed Mitigation, Management and Optimization Measures 13–37
13.4.4 Residual Impact Assessment 13–38

13.4.5 Summary of Residual Economic Development and Employment Impacts 13–40
13.5 Education and Workforce Training.....13–42
13.5.1 Context 13–42
13.5.2 Identification and Initial Assessment of Potential Impacts.....13–43
13.5.3 Proposed Mitigation, Management and Optimization Measures.....13–45
13.5.4 Residual Impact Assessment 13–46
13.5.5 Summary of Education and Workforce Training Residual Impacts 13–46
13.6 Community Health and Safety 13–48
13.6.1 Context 13–48
13.6.2 Identification and Initial Assessment of Potential Impacts.....13–51
13.6.3 Proposed Mitigation, Management and Optimization Measures.....13–60
13.6.4 Residual Impact Assessment 13–62
13.6.5 Summary of Residual Community Health and Safety Impacts.....13–78
13.7 Governance and Leadership.....13–72
13.7.1 Context 13–72
13.7.2 Identification and Initial Assessment of Potential Impacts.....13–74
13.7.3 Proposed Mitigation, Management and Optimization Measures.....13–76
13.7.4 Residual Impact Assessment 13–77
13.7.5 Summary of Residual Governance and Leadership Impacts 13–78
13.8 Law and Order 13–80
13.8.1 Context 13–80
13.8.2 Identification and Initial Assessment of Potential Impacts.....13–81
13.8.3 Proposed Mitigation, Management and Optimization Measures.....13–85
13.8.4 Residual Impact Assessment 13–86
13.8.5 Summary of Residual Law and Order Impacts.....13–88
13.9 Transport and Access 13–90
13.9.1 Context 13–90
13.9.2 Identification and Initial Assessment of Potential Impacts.....13–90
13.9.3 Proposed Mitigation, Management and Optimization Measures.....13–93
13.9.4 Residual Impact Assessment 13–94
13.9.5 Summary of Residual Impact Assessment for Transport and Access Impacts..13–95
13.10 References.....13–97
14. Impacts: Cultural Heritage.....14–1
14.1 Context.....14–1

14.2 Cultural Heritage Impact Assessment Method 14–6
14.2.1 Cultural Heritage Receptors 14–7
14.2.2 Cultural Heritage Value Importance 14–8
14.2.3 Cultural Heritage Impact Assessment Magnitude and Sensitivity 14–11
14.3 Identification and Initial Assessment of Potential Impacts 14–13
14.3.1 Tangible Cultural Heritage 14–14
14.3.2 Intangible Cultural Heritage 14–21
14.4 Proposed Mitigation and Management Measures 14–26
14.4.1 Tangible Cultural Heritage 14–26
14.4.2 Intangible Cultural Heritage 14–27
14.4.3 Stakeholder Engagement 14–28
14.5 Assessment of Residual Impacts 14–28
14.5.1 Tangible Cultural Heritage 14–28
14.5.2 Intangible Cultural Heritage 14–30
14.6 Summary of Residual Cultural Heritage Impacts 14–31
14.7 References 14–36
15. Impacts: Amenity and Climate Change 15–1
15.1 Air Quality 15–1
15.1.1 Context 15–1
15.1.2 Discipline-specific Impact Assessment Method 15–3
15.1.3 Identification of Potential Impacts 15–7
15.1.4 Proposed Mitigation and Management Measures 15–12
15.1.5 Residual Impact Assessment 15–13
15.2 Greenhouse Gases and Climate Change 15–23
15.2.1 Context 15–23
15.2.2 Discipline-specific Impact Assessment Method 15–23
15.2.3 Identification of Potential Impacts 15–26
15.2.4 Proposed Mitigation and Management Measures 15–30
15.2.5 Residual Impact Assessment 15–30
15.3 Noise 15–32
15.3.1 Context 15–32
15.3.2 Discipline-specific Impact Assessment Method 15–33
15.3.3 Identification of Potential Impacts 15–37
15.3.4 Proposed Mitigation and Management Measures 15–40

15.3.5 Residual Impact Assessment 15–41
15.4 Landscape and Visual Amenity 15–48
15.4.1 Context 15–48
15.4.2 Discipline-specific Impact Assessment Method 15–49
15.4.3 Identification of Potential Impacts 15–53
15.4.4 Proposed Mitigation and Management Measures 15–57
15.4.5 Residual Impact Assessment 15–58
15.4.6 Summary of Residual Impacts to Landscape and Visual Amenity 15–61
15.5 Commercial Traffic and Transport 15–64
