

Final Results of Environmental Review

NEXI has obtained the documents necessary for the environmental reviews and confirmed the following:

- (1) Reference Number
19-005
- (2) Project Name
Development of natural gas field
- (3) Project Site
Gydan Peninsula, Russia
- (4) Project Outline
Development of gas field and export of LNG
- (5) Category
A
- (6) Reason of Categorization
The project falls into the large-scale development of oil and natural gas field sector, pipelines sector, ports and harbors sector, is located in a sensitive area, and has sensitive characteristics under the Environmental Guidelines.
- (7) Environmental Permission / Approval by the Environmental Authority
The Environmental Impact Assessment reports of Material Offloading Facility, Field Development, Exploitation/Waste wells, LNG plant, and Terminal Facility were developed in accordance with the laws and regulations in Russia, and approved by the competent authority as of April 2020.
- (8) Pollution Prevention
The appropriate measures against pollutions, including air quality, water quality, waste, soil contamination, noise and vibration, subsidence, odor and sediment will be taken.

(9) Natural Environmental Considerations

There are no natural protected area in the project site. The appropriate measures against the impact to the natural environment will be taken.

(10) Social Considerations

The project does not involve involuntary resettlement. The appropriate considerations against impact to the social environment will be taken.

(11) Applied International Standards

IFC Performance Standards

(12) Monitoring

The monitoring results will be reported annually to the related governmental authorities by the project sponsor. Specific monitoring plan and Environment and Social Management Plan will be developed.
