

Results of Environmental Review

- (1) Reference Number
10-047
- (2) Project Name
Water supply reliability improvement project
- (3) Project Site
Makati city and the other areas in Metro Manila, Philippines
- (4) Project Outline
Improvement of reliability of water supply system through rehabilitation and other works
- (5) Category
B
- (6) Reason of Categorization
The project is not located in or near a sensitive area, nor has it sensitive characteristics under the Environmental Guidelines, and its potential adverse impacts on the environment are not likely to be significant.
- (7) Environmental Permission/Approval by the Environmental Authority
EIA procedure is not required for the components of this project under the relevant environmental regulations of the host country.
- (8) Anti-Pollution Measures
No particular environmental impacts are foreseen. The measures for water quality control of temporary waste water at maintenance work and waste management meet the local standards and international standards.
- (9) Natural Environmental Considerations
The project is not located in or near nationally-designated protected areas or protected areas under the international treaties.

(10) Social Considerations

No social impacts including resettlement have been identified in the project.

(11) Monitoring

Excavated soil is appropriately managed. Monitoring of air, water and waste is to be conducted and reported to Environmental Management Bureau and Laguna Lake Development Authority in accordance with the requirement of the relevant authorities of the host country. The monitoring results are also reported to Metropolitan Water Works and Sewerage System which holds jurisdiction over the project sponsor.
