Please provide information on the scale of the project (project area, area of plants and buildings, production capacity, amounts of power generation, etc.) Further, please explain whether an execution of EISA is required on account of the large scale of the project in the country where the project is implemented.

The Project site is located within the Sahab District in the Amman Governorate, approximately 2.5 km northeast of the Levant Power Plant [IPP4] built and operated by AES Jordan. The site has a proposed footprint of 498,000m², currently under the ownership of the Government of Jordan. The area to be covered by solar panels will be up to 350,000m².

At present, the development site is clear of structures and has been subject to recent earthworks by the Jordanian Ministry of Land. There is very sparse indigenous vegetation on-site and the Project site is not known to contain any sensitive flora or fauna.
