

## Specifications

### 1. Project Name

Provision of database and data analysis tools specialized in airlines

### 2. Terms of Reference

The tool provider must provide database and data analysis tools “specialized in airlines” that meet all of the following requirements.

- ① The tools perform database functions for data publicly released by airlines and can be accessed for the financial data as well as aviation management data including the number of owned aircraft, RPKs (Revenue Passenger Kilometers), ASKs (Available Seat Kilometers) and costs.
- ② The format of retrieved data can be customized.
- ③ The tools can make comparisons across specific airlines and easily adjust related data to facilitate the comparison. Such adjustments include, but are not limited to, the followings:
  - Adjustment of data which are the same content-wise but released under different names among airlines;
  - Foreign exchange adjustment;
  - Adjustment between different accounting periods;
- ④ The tools provide one-stop access to the data source from which data is retrieved.
- ⑤ Data for a specific quarter as well as annual data can be retrieved.
- ⑥ Data processing, such as integration of data of certain airlines, can be done easily for segment analysis.
- ⑦ Graphs can be produced easily using the retrieved data and such graphs or data can be stored in all types of electronic files (e.g. EXCEL, WORD, PDF, JPEG).
- ⑧ The tools can prioritize airlines’ publicly-released data based on relevance.
- ⑨ Data from at least 180 airlines can be retrieved.

### 3. Contract Period

The contract will enter into force for a period of one year upon the signature of the contract.
